

Seed Bomb Cannon ©

Ages 12+ Made in PA, USA

Use the seed bomb cannon to distribute seed balls into fields while having fun. The best time to use the seed bomb cannon is fall, because the winter rains and snows can help break the seed balls down and get those seeds close to the ground, where they need to be to grow.

Directions

It takes some practice to get it right, but once you get it down, seed balls will be sailing!

1. Practice with a similarly sized and shaped item. Round dog kibble works well. Items must fit in the aperture and roll in the tube smoothly!
2. Make certain the area is clear of animals, people, and structures.
3. Put a single seed ball in the mouth of the cannon. Hold the cannon vertically with the curvature pointing forward.
4. Lower the cannon over your shoulder next to your ear or behind your head.
5. Listen for the sounds of the seed ball rolling down the shaft of the cannon.
6. When the seed ball approaches the open end of the pipe, fling the pipe forward. **DO NOT LET GO** of the pipe!

Trouble shooting

- Seed Balls hit the ground in front of me. Don't wait so long to fling the cannon.
- Seed Balls shoot too high. Wait longer to fling the cannon.
- Seed Balls explode in the air. Flinging too hard. Don't worry, those seeds may grow where they land!
- I shoved something into the cannon and I can't get it out! Try water in the cannon, shake and fling it with some water inside. Alternately, get a dowel or metal rod and poke the lodged item out from the hole in the handle.

DON'Ts

- DO NOT fling seed balls at cars, buildings, people, siblings, or animals.
- DO NOT fling anything harder than a seed ball.
- DO NOT use cannon if there are small kids around that could get in the way or get hurt.
- DO NOT swing the cannon at people, animals, or anything else. It can hurt the target and the cannon.

THIS IS NOT A TOY. This is intended for the dispersal of seed into open land areas only. Seed-Balls.com is not responsible for any injury or damage done. Do not use within 15 feet of younger children, and never use with people forward of you within 100 yards.

P.S. Take your cannon to the lake with some fish pellets and feed the fish!

Refills

Visit <http://shop.seed-balls.com> for refills. Please include a note with your order, specifying that this for a cannon, and we can make certain that you get the right size seed balls! grow@seed-balls.com
